# Customer Offices of Assistance

*Where to call when you have a problem or question. We are ready and able to assist you.*

The primary focus for business at the Defense Supply Center Columbus (DSCC), S9C and S9E, is the Military Customer. This page lists the offices where you will get points of contact and answers to your questions.

Whether you need assistance with a specific weapons system, national stock number (NSN), part number, status of a requisition, or any subject you may need information about.

## Customer Advocacy Group

The watchdog for customer service issues at DSCC. The group consists of the;

- Customer Call Center
- Emergency Supply Operations Center (ESOC)
- The Marketing Office
- The Logistics Engineering and Readiness Office

These offices are chartered to provide *World Class* customer service by partnering with our customers to sustain weapons system readiness and warfighter capabilities.

## Aerospace Weapon Systems Application Group

The Aerospace Group continually strive to sustain mission readiness by reducing cycle time, reducing cost, and improving quality in support of our customers.

## Commodities-Based Application Group

The Commodity-Based Group manages over 1.7 million items in more than 27 Federal Supply Groups (FSG) and in more than 200 Federal Supply Classes (FSC). We process over 3 million requisitions annually in support of more than 1200 weapon systems.

## Land Weapon Systems Application Group

The Land Group, is the warfighter's wholesale logistics combat multiplier. As the name implies, the Land group manages the total supply support and directs the distribution of consumable repair parts for over 600 land-based weapon systems maintained by all services of the United States Military. From the M-1 Abrams main battle tank to the 6,000 pound rough terrain forklift, Land keeps the wheels rolling everyday, around the clock, around the world.

## Maritime Weapon Systems Application Group

The Maritime Weapon System Gro
to sustain and enhance our custo
readiness by providing what our c
need, when they need it, whether
on peace keeping missions aroun
or training at their home bases.

# Doing Business With DSCC

## *Welcome To DSCC!*

Thank you for taking the time to investigate doing business with the Defense Supply Center Columbus (DSCC). Our primary customer is the United States Military. We are the largest Inventory Control Point (ICP) in the Defense Logistics Agency (DLA). Currently, we manage over 2.2 million S9C (Construction) and S9E (Electronics) spare parts in over 155 different Federal Supply Classes (FSCs).

Within this web site you shall find:

- How to input a Requisition (A0A, A01), Check Requisition and/or Asset Status
- Why our Emergency Supply Operations Center (ESOC) is the "Lifeline to the Military" when critical needs arise
- Information necessary to get started (doing business) with DSCC
- Available business opportunities
- Step-by-step explanations of the procurement process
- Pertinent regulations and resources to interact effectively with the systems and associates at DSCC.

Provided below are the Offices/Programs that will help you learn how to procure items from DSCC, and how to sell to DSCC.

### Selling to DSCC

- Getting Started
  Find out how to get started doing business with DSCC.

# Getting Started

[Business Counseling Center (BCC) ] [ BCC Information Brochure and POCs ] [Offices of Assistance]

What is required to do business with DSCC? The handbook "Commodities Purchased by the Defense Logistics Agency" will identify the commodities DSCC manages, in addition to other DLA supply centers. Once you identify that DSCC manages the product(s) you can provide, use the 'Roadmap' below as a guide to what you need to do business with DSCC.

Whether this is your first time marketing your product(s) to DSCC or whether you are one of our experienced contractors, the following information will prove invaluable. You may want to refer to this page often for the most current information.

1. **Administrative Requirements**
2. **Viewing DSCC Solicitations**
3. **DSCC Bidset Interface**
   - Unable to find a specific Drawing? Information available **Here**
4. **Requirements for Internet Quoting**

# Administrative

To do business with DSCC, Vendors must register in the Central Contractor Registration (CCR), through the Defense Logistics Information Service (DLIS). Vendors need a Data Universal Numbering System (DUNS) Number from Dun and Bradstreet to register in CCR. The DUNS is used to establish a unique identifier for each CCR vendor.
A financial account capable of receiving Electronic Funds Transfers (EFT) is a mandatory requirement, and is provided in the CCR registration. Credit card ordering, using the Government VISA card is gaining popularity.

When you register in the CCR, if you do not have a Commercial and Government Entity (CAGE) Code, one will be assigned to you when you complete the CCR registration. An on-line CAGE code search is available for looking up your company or another company's CAGE code.

# View DSCC Solicitations

Only solicitations estimated at or below the Simplified Acquisition Threshold (SAT, $100,00), are available electronically.  The solicitations are in HTML format, they can be viewed at DSCC RFQs.

No additional software capabilities are required.  If the solicitation is not available electronically, and under the SAT, check with the assigned buyer. The DSCC Buyer Search may be found at Buyer Search .  If the buyer is not listed, please call the Business Counseling Center at (614) 692-3541.

If the solicitation is estimated over the SAT, or if it has special clauses attached ("Special Q's"), contact the Industry Coordination Office at (614) 692-1775 or e-mail indcoord @dscc.dla.mil

# DSCC Bidset Interface

The Bidset Interface allows Engineering Data Lists (EDLs) and digitized drawings for **open DSCC procurements** to be electronically retrieved by the public. Drawings that are **not** in electronic format, are classified, or have restrictions on dissemination may be ordered by clicking on "Manual Request" at DSCC Bidset Interface.

DSCC Solicitations identified as having associated (non-classified) drawing are identified by the following icon ( ), immediately after the NSN field in the results set of any Custom Query. The digitized drawings are in CALS RASTER format (MIL-PRF-28002C), so a CALS RASTER format viewer program is required to view the drawings. Software used to view images can be downloaded from this site free. The examples below are not intended to imply product preference. There are other suitable image viewers that can purchased to view our drawings.

- **JViewer**

## How to Order DSCC Drawings

There may be times when the drawing for an open solicitation may not be available in electronic format.

Drawings may be requested from the DSCC Technical Data Repository. Complete instructions are available at DSCC Bidset Interface

---

## Requirements for Internet Quoting

*Electronic quoting on the DSCC Internet Bid Board System (DIBBS) is **mandatory** for RFQs with "T" or "U" in the 9th position of the solicitation number, and optional for all other DSCC RFQs.*

---

Technical Requirements

- Comprehensive instructions on the technical requirements for DIBBS and how to register are available at the DIBBS Technical Requirements page.
